Vitacell

Buy On-Line

You rely on your body's natural immune system defences to protect you from harm and maintain your good health. Each cell in your body has a specific role to fill in this process. In order for your cells to work properly, they must have an adequate supply of the necessary vitamins and minerals; they need to be protected from harmful substances; they need to communicate with each other; and they must undergo a normal cycle of birth, growth, reproduction and death.

Price: £51.

60 tablets (Item Coc

Throughout a cell's normal lifecycle, there are numerous chances for miscommunication or other mistakes. Most of these cells are repaired or removed naturally by the immune system, but occasionally these cells are overlooked - especially if your body is not receiving the nutrition, exercise and rest it needs to work properly. As we age, it becomes more and more likely that some of these cells will be overlooked.

VitaCell is designed to support cell purification, or the removal of these cells from the body. The three natural plant substances in *VitaCell* encourage healthy cell communication, nurture the immune system and support healthy cell cycles.

Usage:

Suggested dosage for adults is two capsules per day to promote healthy cells. The benefits of Maitake mushroom may be improved by concurrent vitamin C supplementation, such as that found in D-Toxarate. *VitaCell* can be given to children over two years of age. For children who cannot swallow the capsule whole, pull capsule apart and mix in food or drink. For ½ capsule doses, pull capsule apart and separate contents in half. Reseal capsule to store second ½ dose.

Ingredients:

Maitake Mushroom Standardized Extract, Lycopene (3.26mg active Lycopene), Polygonum Cuspidatum Extract (root), Containing trans - Resveratrol. TOTAL ACTIVES 331.75mg
